ONE VISION = TWO MISSIONS

IIA chapter support is critical to advancing the future of our profession. The IIA has two charitable arms that invest in internal audit, The IIA Research Foundation and Academic Relations. While each foundation has TWO missions, together we have ONE vision: a global profession advanced through awareness, education, research, and knowledge sharing. The vision can be accomplished with your support of the missions of these two organizations.

- **The IIA Research Foundation** provides groundbreaking research and educational publications that help the internal auditor and the profession.
  - Over 400 products are available through the IIARF Bookstore including 200 research reports, internal audit publications, tools and reference materials.
  - The Foundation funds research projects based on feedback from chapters on the topics of interest to those in the profession, many of these projects are available as a free download to IIA members.
  - Done every 5 years, The Common Body of Knowledge Study (CBOK) is unprecedented global research that is leveraged for future projects.
  - The Foundation also offers grants and awards that support research by students, educators, IIA Chapters and Institutes and other curious minds wanting to make a difference in our profession.
  
  Learn more about The Research Foundation at [www.theiia.org/research](http://www.theiia.org/research)

- **IIA Academic Relations** provides an opportunity for professors and students to have access to the resources they need to promote and study internal auditing globally.
  - IIA Academic Relations supports the Internal Auditing Education Partnership (IAEP) program consisting of 48 universities located in 11 countries that have an IIA endorsed internal audit programs. Program support and grant funding is available for our IAEP schools.
  - IIA Academic Relations hosts an annual IAEP Leadership Networking Conference for IIA endorsed internal audit programs. This conference is where internal auditing students have the opportunity to learn about the internal audit profession, how to market themselves to potential employers, leadership skills, and network and interviewing with corporations ready to hire.
  - IIA Academic Relations awareness efforts expose students to a career in internal auditing and allow educators the opportunity to learn how to incorporate internal auditing within their university curriculum.
  - IIA Academic Relations is the program that supports these efforts; the program is funded through contributions to the Internal Auditing Academic Advancement Fund (IAAAF), a restricted fund specifically for IIA Academic Relations initiatives.
