Influential

The Centers are designed to provide meaningful resources to assist auditors in their role in the public, financial services, and environmental, health, sustainability, and safety arenas. This includes an advocacy platform for building relationships with stakeholders such as regulators, government officials, standard-setting bodies, boards of directors, audit committee members, executive management, external auditors, shareholders, customers, and the business community at large.

Impactful

The Centers exist to help members accomplish their objectives by researching and developing exclusive publications, industry insights and news, and peer knowledge sharing opportunities that address the unique needs of auditors in these specialized fields. The innovative content not only provides thought leadership on emerging issues, but also reinforces the globally accepted standards and guidance that are The IIA’s foundation.

Indispensable

Whether through online forums or in-person networking, the Centers focus on relevant content and emerging issues that provide members the ability to continually advance in their profession. No matter what your training needs are, the Specialty Audit Centers offer a variety of training and development opportunities through webinars, eWorkshops, on-demand training, seminars, and conferences.

10 unique pieces of EHS thought leadership
As an EHS audit professional, The IIA's EHS Audit Center has become an invaluable resource in all aspects of my career. There are so many opportunities that the Center provides to its members, including education opportunities through informative webinars and the Knowledge Library's repository of thought leadership. The Center plays a critical role in advocating for the EHS profession so we can focus on serving our clients and the communities we work in. The Center is one of the most effective tools that an EHS audit professional can have at their disposal.
